

BUILT ON SOLANA · WHU × SUPERTeam GERMANY 2026

Blitzrechnung

Get paid by clients outside the eurozone in seconds,
with German tax notes built in.

► Demo video: blitzrechnung-one.vercel.app/demo.mp4

Sohee Lee · AI integration developer in Germany · blitzrechnung-one.vercel.app

THE PROBLEM

Getting paid from abroad costs fees, and the German paperwork follows

1 in 4

German freelancers was working for clients based outside Germany
(freelance.de, 2024)

≈5 %

PayPal Checkout fee on a payment from a US client:
2.99 % + 1.99 % outside the EEA, plus a fixed fee

12 %

of freelancers' working time is not billable; bureaucracy is the top reason

WHY NOW

Regulated digital dollars and euros are now allowed in the EU

MICA · SINCE JULY 2024

USDC and EURC comply with the EU's crypto law

Circle issues both under an e-money licence from the French regulator, valid across the EU, including Germany.

OUR FOCUS

Clients outside the eurozone

Inside the eurozone, SEPA Instant already moves euros in seconds. We start where it doesn't reach: the US, UK and Switzerland.

THE SOLUTION

Invoice, QR, paid, booked

The screenshot shows the 'New invoice' form in the Blitzrechnung app. The form is titled 'New invoice' and has a header with 'Blitzrechnung', 'Devnet - test money', 'Settings', and '+ New invoice'. The form is divided into several sections: 'WHERE IS YOUR CLIENT?' with options for 'Germany', 'EU business', and 'Outside the EU'; 'CLIENT' with fields for 'Client' (Nova Labs) and 'Client email (optional)' (billing@novalabs.example); 'SERVICE' with a field for 'AI chatbot integration'; 'NET AMOUNT' with a field for '15'; 'CURRENCY' with a dropdown for 'USD - paid in USDC'; 'VAT' with a dropdown for '0 %'; 'INVOICE NUMBER' with a field for 'RE-2026-001'; and 'DUE DATE' with a field for '10/12/2026'. At the bottom, there is a table showing 'Net' (15,00 \$), 'VAT 0 %' (0,00 \$), and 'Client pays' (15,00 \$ in USDC). A blue button at the bottom says 'Create invoice & payment QR'.

1. Pick where the client is. The German VAT rule and the legally required note are added automatically.

The screenshot shows the invoice confirmation page in the Blitzrechnung app. The page is titled 'RECHNUNG / INVOICE' and has a header with 'Blitzrechnung', 'Devnet - test money', 'Settings', and '+ New invoice'. It features a 'PAYMENT LINK FOR YOUR CLIENT' section with a URL and buttons for 'Copy link', 'Open', and 'Print / PDF'. The main section displays the invoice details: 'RE-2026-001', 'FROM: Sohee Lee - AI Integration', 'TO: Nova Labs', 'Date: 28.9.2026', and 'Due: 12.10.2026'. A QR code is shown on the right. Below the QR code, it says 'Scan with Phantom or any Solana Pay wallet to pay 15,00 \$ in USDC'. The invoice items are listed in a table: 'AI chatbot integration' (15,00 \$), 'USt. 0 %' (0,00 \$), and 'Total' (15,00 \$). A blue button at the bottom says 'All invoices'.

2. Every invoice gets a Solana Pay QR and a payment link for the client.

Payment settles in seconds on Solana. This page updates automatically.

4. Seconds later the invoice turns **Paid** by itself, with a link to the transaction.

Solana devnet with test USDC · "Nova Labs" is a fictional client used for the demo

EVIDENCE

Measured on our first payment

3.1 s

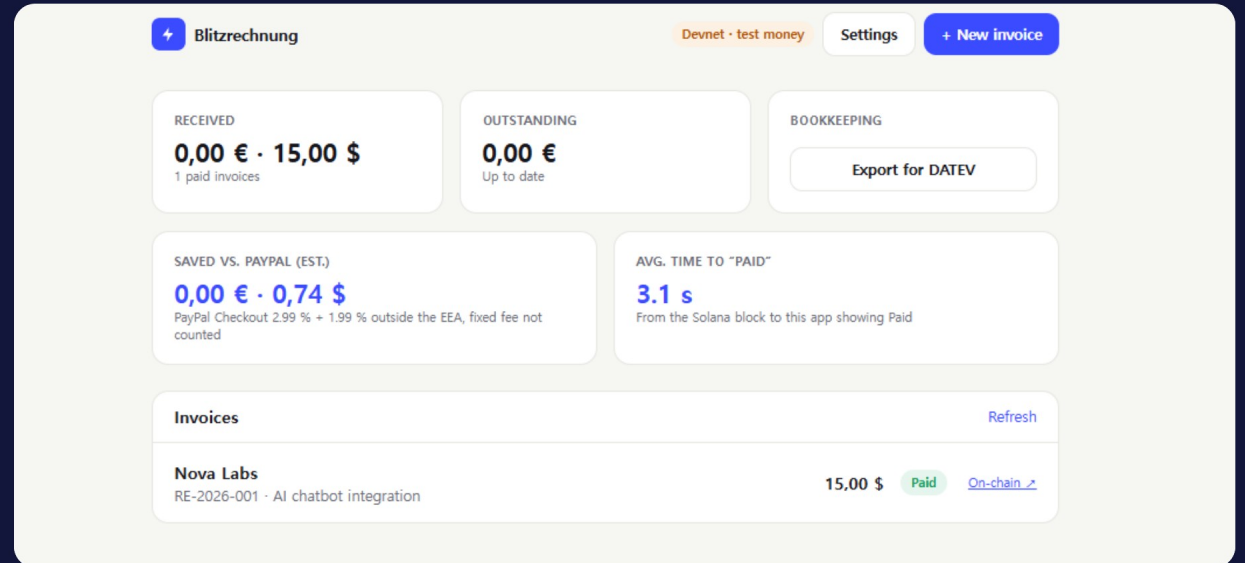

from the Solana block to "Paid" in the app

0.000008 SOL

network fee, versus about \$74.70 PayPal would take on a \$1,500 invoice (est.)

0 banks

the invoice is matched to the payment on-chain, no manual reconciliation

Devnet payment, 28 Sep 2026 · PayPal estimate: 2.99 % + 1.99 %, fixed fee not counted

WHY SOLANA

Solana is the payment rail and the receipt

Solana Pay

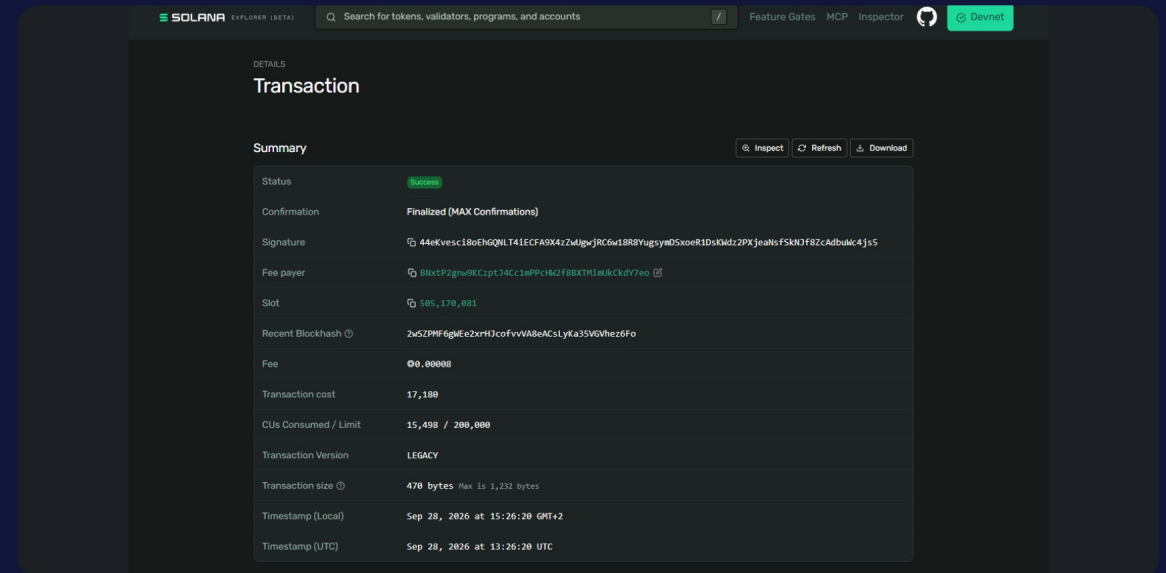

A standard QR and link format that Phantom, Solflare and other wallets understand.

One reference key per invoice

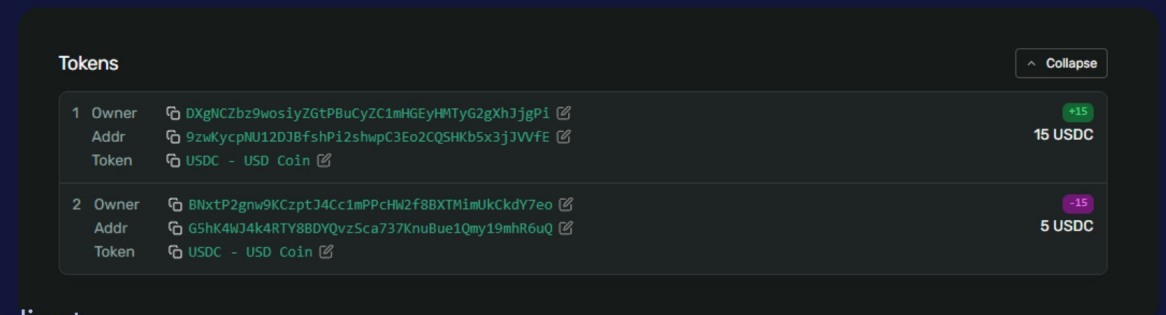

Attached to the payment, so the app finds it on-chain and marks the invoice paid.

Public, permanent proof

The transaction ID goes into the bookkeeping export for the tax advisor.

Solana Explorer, devnet · +15 USDC to the freelancer, -15 USDC from the client

WHO FIRST, WHAT NEXT

Built for freelancers like me

What it does

Stablecoin payment and the German tax note, in one flow, with the transaction ID in the export.

First users

German freelancers whose clients already hold USDC: Web3 startups and US tech teams. Reach them through Superteam Germany and freelancer communities.
