

BUILT ON SOLANA · WHU × SUPERTeam GERMANY 2026

Blitzrechnung

Get paid by clients outside the eurozone in seconds,
with German tax notes built in.

Sohee Lee · AI integration developer in Germany · blitzrechnung-one.vercel.app

THE PROBLEM

Getting paid from abroad costs fees, and the German paperwork follows

1 in 4

German freelancers was working for clients based outside Germany
(freelance.de, 2024)

≈5 %

PayPal Checkout fee on a payment from a US client:
2.99 % + 1.99 % outside the EEA, plus a fixed fee

12 %

of freelancers' working time is not billable; bureaucracy is the top reason

WHY NOW

Regulated digital dollars and euros are now allowed in the EU

MICA · SINCE JULY 2024

USDC and EURC comply with the EU's crypto law

Circle issues both under an e-money licence from the French regulator, valid across the EU, including Germany.

OUR FOCUS

Clients outside the eurozone

Inside the eurozone, SEPA Instant already moves euros in seconds. We start where it doesn't reach: the US, UK and Switzerland.

THE SOLUTION

Invoice, QR, paid, booked

The screenshot shows the 'New invoice' form in the Blitzrechnung app. The form is titled 'New invoice' and has a header with 'Blitzrechnung', 'Devnet - test money', 'Settings', and '+ New Invoice'. The form is divided into several sections: 'WHERE IS YOUR CLIENT?' with options for 'Germany' (German VAT applies), 'EU business' (Reverse charge — 0 % VAT, client's VAT ID required), and 'Outside the EU' (Not taxable in Germany — 0 % VAT (e.g. US, UK, CH)). The 'CLIENT' section has fields for 'Client' (Nova Labs) and 'Client email (optional)' (billing@novalabs.example). The 'SERVICE' section has a field for 'Service' (AI chatbot integration). The 'NET AMOUNT' section has fields for 'Net amount' (15), 'Currency' (USD — paid in USDC), and 'VAT' (0 %). The 'INVOICE NUMBER' section has fields for 'Invoice number' (RE-2026-001) and 'Due date' (10/12/2026). The 'Summary' section shows 'Net' (15.00 \$), 'VAT 0 %' (0.00 \$), and 'Client pays' (15.00 \$ in USDC). A blue button at the bottom says 'Create invoice & payment QR'.

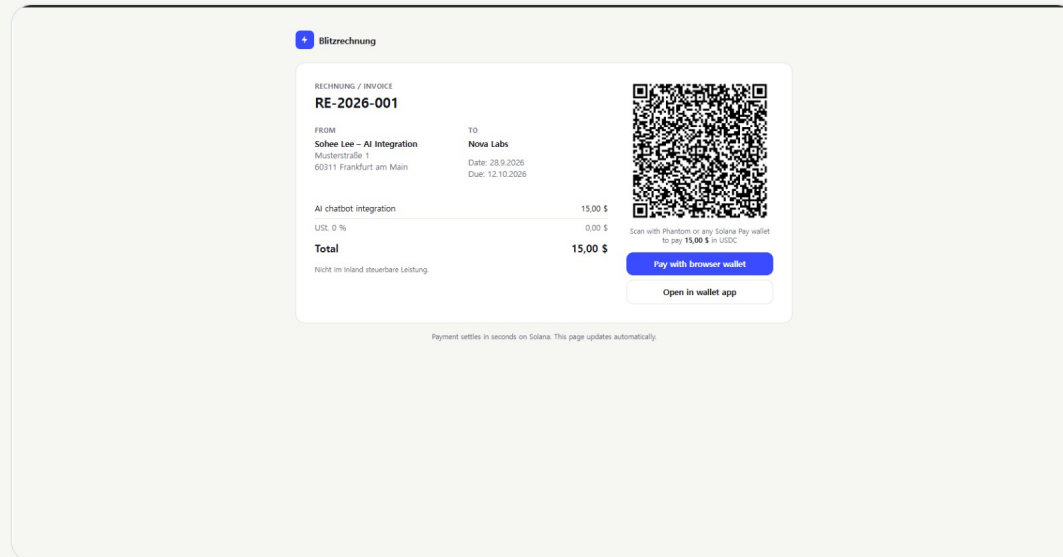

1. Pick where the client is. The German VAT rule and the legally required note are added automatically.

The screenshot shows the invoice confirmation page in the Blitzrechnung app. The page is titled 'RECHNUNG / INVOICE' and has a header with 'Blitzrechnung', 'Devnet - test money', 'Settings', and '+ New Invoice'. The page displays the 'PAYMENT LINK FOR YOUR CLIENT' (https://blitzrechnung-one.vercel.app/pay?i=ty2026001&id=10130550900221) with buttons for 'Copy link', 'Open', and 'Print / PDF'. The invoice details are shown in a table: 'FROM: Schae Lee — AI Integration, Musterstraße 1, 60311 Frankfurt am Main' and 'TO: Nova Labs, Date: 28.9.2026, Due: 12.10.2026'. The table lists the 'AI chatbot integration' for 15.00 \$ and 'USDC 0 %' for 0.00 \$. The 'Total' is 15.00 \$. A QR code is displayed on the right side of the page. Below the QR code, it says 'Scan with Phantom or any Solana Pay wallet to pay 15.00 \$ in USDC'. A blue link at the bottom says '→ All invoices'.

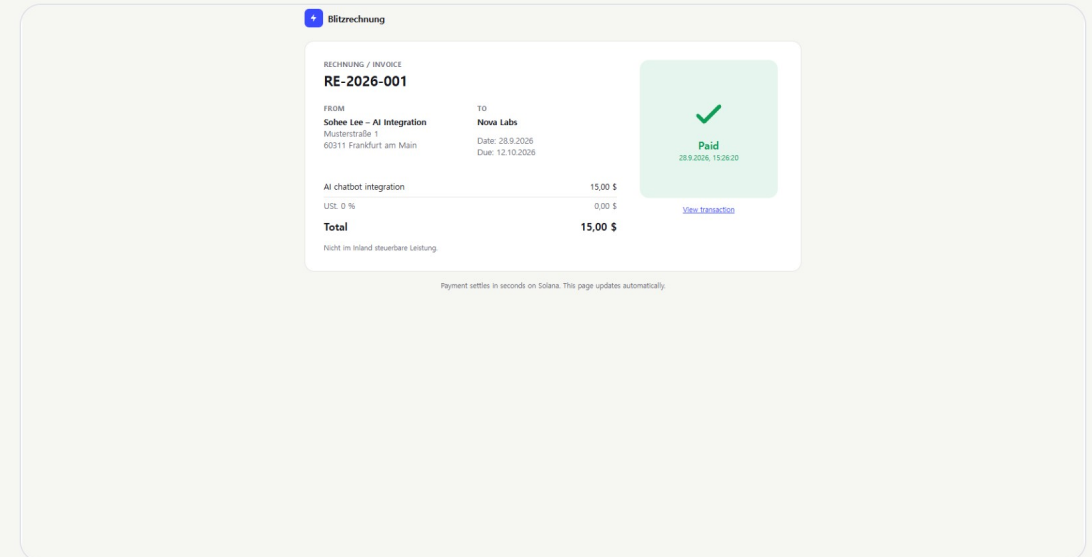

2. Every invoice gets a Solana Pay QR and a payment link for the client.

DEMO

A US client pays in USDC

3. The client opens the link and pays with Phantom or any Solana Pay wallet.

4. Seconds later the invoice turns **Paid** by itself, with a link to the transaction.

EVIDENCE

Measured on our first payment

3.1 s

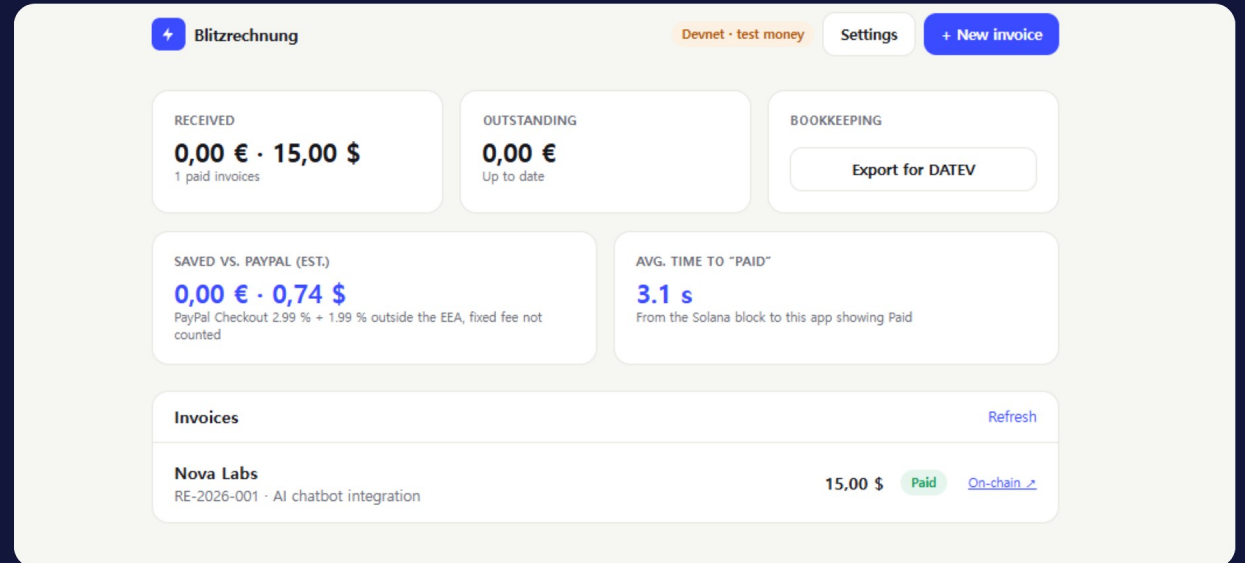

from the Solana block to "Paid" in the app

0.000008 SOL

network fee, versus about \$74.70 PayPal would take on a \$1,500 invoice (est.)

0 banks

the invoice is matched to the payment on-chain, no manual reconciliation

Devnet payment, 28 Sep 2026 · PayPal estimate: 2.99 % + 1.99 %, fixed fee not counted

WHY SOLANA

Solana is the payment rail and the receipt

Solana Pay

A standard QR and link format that Phantom, Solflare and other wallets understand.

One reference key per invoice

Attached to the payment, so the app finds it on-chain and marks the invoice paid.

Public, permanent proof

The transaction ID goes into the bookkeeping export for the tax advisor.

The screenshot shows the 'Transaction' details page on the Solana Explorer. The page has a dark theme. At the top, there's a search bar and navigation links like 'Feature Gates', 'MCP', 'Inspector', and 'Devnet'. The main content area is titled 'Transaction' and includes a 'Summary' section with a table of transaction details. The status is 'Success' in a green box. The confirmation is 'Finalized (MAX Confirmations)'. The signature, fee payer, slot, recent blockhash, fee, transaction cost, CUs consumed, transaction version, transaction size, and timestamps are all listed.

Summary	
Status	Success
Confirmation	Finalized (MAX Confirmations)
Signature	44kVesc18uEhGQNL141ECFAD44z2WgWj8C6w188Yugsynd5xoeR1DskMdz2PXJeaNsFSkN3f8ZcAdBuk4Js5
Fee payer	BNxtP2gnw9KCzptJ4Cc1mPPcHw2f8BXTMimUkCkdY7eo
Slot	585,179,881
Recent Blockhash	2uSZPMF6gHe2xrhJcoFvvVABeACsLyKa35VQvhez6Fo
Fee	0.000018
Transaction cost	17,180
CUs Consumed / Limit	15,498 / 200,000
Transaction Version	LEGACY
Transaction size	470 bytes Max is 1,232 bytes
Timestamp (Local)	Sep 28, 2026 at 15:26:28 GMT+2
Timestamp (UTC)	Sep 28, 2026 at 13:26:28 UTC

The screenshot shows the 'Tokens' page on the Solana Explorer. It lists two token transactions. The first transaction shows a transfer of 15 USDC to an owner. The second transaction shows a transfer of 5 USDC from an owner. Each entry includes the owner's address, the token's address, and the token's name.

Tokens	
1	Owner: DXgNCZbz9wosiyZGtPBuCyZC1mHGeyHMTyG2gXhJjgPi Addr: 9zwKycpNU12DJBfshP12shwPC3Eo2CQSHKb5x3j3VVfE Token: USDC - USD Coin +15 USDC
2	Owner: BNxtP2gnw9KCzptJ4Cc1mPPcHw2f8BXTMimUkCkdY7eo Addr: G5hK4WJ4k4RTY8BDYQvzSca737KnuBue1Qmy19mhR6uQ Token: USDC - USD Coin -15 USDC

Solana Explorer, devnet · +15 USDC to the freelancer, -15 USDC from the client

WHO FIRST, WHAT NEXT

Built for freelancers like me

What it does

Stablecoin payment and the German tax note, in one flow, with the transaction ID in the export.

First users

German freelancers whose clients already hold USDC: Web3 startups and US tech teams.
